About Me

Frontend Developer and Technical Lead passionate about building innovative and efficient web solutions. With more than four years of experience, I specialize in developing scalable applications that solve real-world problems while delivering high-quality user experiences.

Skills

- Javascript/Typescript
- React JS/Next JS
- Flutter
- Storybook
- Git
- Figma

Education & Certifications

- Information Systems Analyst**
ORT Argentina 2022 - 2024
Education focused on the analysis, design, and development of information systems, providing a strong foundation for roles in software development, functional analysis, software testing and quality assurance, software architecture, and technical project leadership.
- Professional Webmaster**
Universidad tecnológica nacional 2019
Comprehensive Professional Webmaster training program covering the core technologies used in web design and application development. The curriculum included both front-end design and development, as well as dynamic web programming and backend fundamentals.
- Systems Engineering (Incomplete)**
Universidad tecnológica nacional 2019 - 2022
Systems Engineering program at the National Technological University, focused on the development, implementation, and management of information systems. The curriculum emphasized practical problem-solving, technical expertise, and strong alignment with industry needs and real-world applications.
- Electronics Technician**
Casa salesiana PIO IX 2011 - 2015
Education providing a strong foundation in analog and digital electronics, electrical systems, automation, and maintenance, with a practical approach focused on solving real-world technical challenges.

Professional Experience

- Frontend Technical Lead**
Shipnow 2024 - Presente
Led a team of four frontend developers responsible for the development and maintenance of web and mobile applications within the logistics ecosystem. The team worked across multiple solutions, including a seller platform for order management, a traffic operations platform for route planning and administration, and a mobile application that enabled drivers to complete and track deliveries in real time.
- Frontend Developer**
Shipnow 2021 - 2023
Implemented new features across multiple applications, conducted code reviews, and provided constructive feedback to promote code quality and team growth. Collaborated closely with UX designers to define technically feasible solutions aligned with user experience goals, ensuring high-quality implementation and validating final outcomes.
